EDUCATION

Bachelor's degree
Computer Engineering
University of Padua
📅 2021 - 2024
📍 Padua, PD, Italy

GCE Advanced Level
Mathematics and Computer Science
Liceo Majorana-Corner
📅 2015 - 2020
📍 Mirano, VE, Italy
🎓 GPA: 100/100

PRACTICAL SKILLS

- Agile software development
- Product management
- Mobile development
- Problem-solving
- Team management, Teamwork and Collaboration
- Creativity, Curiosity, Learning and Adaptability

TECHNICAL SKILLS

- Frameworks: Flutter, Google Cloud Platform
- VC: Github
- Testing: JUnit
- IDE: Intellij Idea, Android Studio
- PL (advanced): Java, C++, Dart
- PL (familiar): HTML/CSS, JavaFX

MY PROFILE

Determined Startup Founder and passionate Computer Engineering Student with a strong interest in software engineering and focused on innovative solutions. Skilled in product management, I leverage my creativity and problem-solving skills to develop high-quality software. Through empathy and collaboration, I create a productive and stimulating work environment to deliver project success. Seeking new challenges to apply my technical skills and acquire new expertise.

PROJECTS EXPERIENCE

Social Network Startup

📅 June 2022 - current

- Independently developed a social network app that runs on both iOS and Android devices
- Learned and mastered the Flutter framework, Dart programming language, and Cloud Firestore in 3 months
- Overcame user management and state handling challenges
- Organized a NoSQL database connected with the app through JSON queries
- Implemented a map screen using the Google Maps API
- Conducted specific market and competitor analyses related to costumers' needs
- Presented software to an expert software engineer receiving recognition for design ideas, implementation and market alignment
- Conducted interviews and successfully onboarded 2 collaborators to enhance the project

Software Engineering Project

University of Padua

📅 April 2023 - June 2023

- Collaborated with a 4 individuals team and delivered a 30/30 score project
- Executed Agile-Scrum development strategy
- Gathered project requirements through Use Cases and User Stories, ensuring alignment with stakeholder needs
- Crafted a comprehensive software architecture, producing design artifacts including Domain Models, Design Class Models and Sequence Diagrams
- Utilized GRASP and GoF design patterns to enhance software's maintainability and scalability
- Conducted testing, including Unit Tests (JUnit) and manual System Tests, to ensure software reliability and functionality
